ABOUT RESETTABLE SWITCHES

Reliable Power Control with Integrated Protection

Bocatech Resettable Switches combine premium LED push-button switching with integrated circuit protection, providing reliable power control and circuit protection in a single switch. Designed specifically for harsh marine environments, these switches eliminate the need to replace traditional fuses while delivering a clean, modern appearance.

Manufactured from corrosion-resistant 316 stainless steel and engineered for long service life, Bocatech Resettable Switches are built to withstand vibration, moisture, and saltwater exposure. Trusted by boat builders, OEM manufacturers, and marine enthusiasts, they provide dependable performance with simplified electrical system protection.
